**Mixing Just Got Easier with Galaxy Audio's New AXS Mixers!**

The new AXS line features a full line of analog audio mixers. The AXS series offers 5 desk top and 3 rack mount models. All models have a USB connection to link to a computer for stereo playback or recording and have +48V phantom power. Additionally, the mono XLR inputs provide an easy-to-use single knob compression and TRS inserts for outboard effects. Most models feature a 3-band EQ with sweep-able mid-range, and low cut filter. All models include AUX sends on each channel.

All AXS models have built in Studio grade DSP FX with 16 effects. Effects include Reverb, Chorus, Flanger, Delay, Pitch Shifter, and Multi-Effect. Each effect has a storable user parameter and a tap button with a tempo light for delay and echo settings.

Each channel also provides the user with Clip LEDs, Mute, Subgroup Routing, L/R Panning and PFL. Whether for installation or portable use, the 60mm logarithmic faders and sealed rotary controls will provide clean, reliable sound.

**Street Price starting at \$279.99**

**Availability: May 2014**
