**Ergo, it is a better microphone...**

Galaxy Audio's new ERGOMIC wired microphone throws a curve into the typical microphone design. The interchangeable elements and unique form of the body make this a microphone for everyone.

The ERGO body was designed with comfort in mind. We started with a thicker body, much like a wireless microphone. Second, the body tapers to fit the natural flow of your hand as you grip the microphone body. Third, a finger/hand rest allow for a relaxing place for your hand or finger and helps prevent your hand from sliding over the microphone element. Lastly, the solid metal construction provides excellent durability.

Topping off the innovative design of the ERGOMIC, the microphone heads can also be easily switched between a Dynamic or Condenser element. The GA64/SC utilizes Galaxy Audio's popular mic elements from the HH64/HH64SC wireless mic transmitter.

**Street Price starting at \$79.99**

**Available: Currently shipping**
