

The new RM-IRD Internet Radio Player is unlike any other media player available.

The RM-IRD has access to over 20,000 stations, broadcasts, and podcasts. The RM-IRD connects to a router via Ethernet cable or WiFi. From there, you have access to a seemingly unlimited number of local, national, and international stations.

Setup and navigation are easy with the 2.7 inch display, which will display up to 6 lines of text. Through the menu screen, you have access to a selection of numerous modes; Equalizer, Network access, Time/Date, Language, etc.

The RM-IRD has many convenient features such as FM w/RDS, Clock w/auto update, Sleep/Snooze, Alarm, permission password, among many others. The RM-IRD features easy to locate and read function buttons on the front panel. These buttons can be illuminated by pushing the LED button on the front panel. This makes for easy controlling in a dark room or when in a rack.

The RM-IRD can share media with other devices on your server/network. The RM-IRD can access files and playlists from Windows Media Player. This allows you to set a playlist on your computer and then have it broadcast through a distributed audio system. Additionally, the RM-IRD can be linked with the Internet Radio Portal/Frontier Silicon Internet Radio Portal. This allows you access to set up favorites and browse through thousands of online stations.
