Introduction to the Galaxy Trek Portable Wireless Mic Systems

Galaxy Audio expands on the highly acclaimed, user-friendly, battery powered, compact Galaxy Trek 2.4 GHz wireless microphone product line.

In addition to the wireless headset and lavalier microphone systems, the Galaxy Trek line now includes instrument microphones for most horn instruments, acoustic and box drum instruments, small stringed instruments such as the violin and viola, and a cable transmitter for most 1/4" output electric instruments. Also featured in the Galaxy Trek line, is a wireless waterproof headset microphone; great for fitness and high perspiration applications in both indoor and outdoor environments. All systems come with a wireless receiver.

In today's cyber world, we use our smartphones for everything; gaming, social media, news updates, shopping, pictures, and video. Getting rich, clear, articulate audio while recording video can be especially difficult when the microphone is not in close proximity to the presenter. The Galaxy Trek wireless transmitter, transmits seamlessly to the included wireless receiver, which simply plugs into the 3.5mm headphone jack of your smartphone, delivering quality audio to your video recording.

The Galaxy Trek receiver will also plug directly into most powered speaker inputs (1/8" & 1/4"). This conveniently adds a wireless microphone to most powered speakers. Aerobics instructors, teachers, videographers, live streamers, presenters, auctioneers, street performers, among many others will find this user-friendly feature a plus.

The Galaxy Trek is powered by long-lasting internal lithium batteries located in both the transmitter and receiver. Charging is quick and easy with the included micro USB cable. The system also includes two adapter cables for both Android and Apple iOS smart devices.

The new Galaxy Trek delivers quality wireless audio to numerous "on the go" applications.

GT-R Receiver Included in All Systems

Included Accessories**

GT-USBCBL
USB Charge Cable

GT-ADP-3.5-6.5

Instrument Microphone Systems: Guitar & Disc Transducer Transmitters

Galaxy Trek Instrument Mic Systems

GT-Q Wireless Portable Guitar Transmitter

GT-Q

- Frequency Response: 20Hz – 20kHz
- 2.4GHz Transmitter with 1/4" Connection
- For Use With Most 1/4" Output Electric Instruments: Electric Guitar, Electric Bass, Electric Piano, Electric Strings

The GT-Q portable, wireless 1/4" cable transmitter offers a lightweight design and high fidelity sound for electric instruments with 1/4" outputs such as electric guitar, electric bass, and more. Simply plug the transmitter into an electric instrument and the receiver into a powered speaker, powered amplifier, USB external sound card, or mixer for instant quality sound. Great for 'on the go' solo and group performances, live sound, and live recording.

GT-INST-1 Wireless Portable Disc Transducer

GT-INST-1

- Frequency Response: 10Hz – 10kHz
- Disc Transducer
- For Use With Acoustic/Sound Box Instruments: Acoustic Guitar, Ukulele, Other Acoustic Stringed Instruments, Box Drum, Cajón

The GT-INST-1 is a portable, wireless disc transducer, featuring a durable, lightweight, high fidelity pickup for acoustic stringed instruments and box instruments. The high-quality disc transducer features rich, full-bodied, clear sound reproduction. Easy instrument attachment and worry-free operation make this a convenient "on the go" microphone solution.

Instrument Microphone Systems: Horn & Violin Transmitters

Galaxy Trek Instrument Mic Systems

GT-INST-3 Wireless Portable Horn Mic

GT-INST-3

- Frequency Response: 40Hz – 16kHz
- Uni-Directional Condenser Gooseneck Microphone
- For Use With Most Horn Instruments: Saxophone, Trumpet, Tuba, Trombone, French Horn

The GT-INST-3 portable, wireless horn mic is a lightweight, high fidelity, flexible gooseneck condenser microphone, making it an excellent choice for most horn instruments. The horn mic captures high quality sound, while its lightweight design offers mobility without adding additional weight to the instrument. The soft rubber clip offers secure and easy attachment while preventing damage to the instrument finish.

GT-INST-6 Wireless Portable Violin Mic

GT-INST-6

- Frequency Response: 196Hz – 12kHz
- Omni-Directional Condenser Microphone
- For Use With Small Stringed Instruments: Violin/Fiddle, Viola

The GT-INST-6 portable, wireless small stringed instrument mic is a lightweight, high fidelity microphone featuring a flexible shockproof bracket for use with violins, fiddle and viola. The omni-directional condenser capsule is designed to reproduce nuanced authentic natural sound. The included soft rubber bracket offers secure and easy attachment while absorbing vibration and preventing damage to the instrument finish.

Galaxy Trek Portable Wireless Headset and Lavalier Microphones

Galaxy Trek Headset & Lavalier Mic Systems

GT-S Wireless Portable Headset Mic

GT-S

- Frequency Response: 20Hz – 20kHz
- Uni-Directional Condenser Cardioid Mic Capsule
- Applications: Classroom, Gym, Track Field, Webcast, Livestream, Social Media, YouTube, Aerobics, Choreography, Tradeshow, Product Demos, and Outdoor Gatherings/Parties

The GT-S portable, wireless headset mic is a lightweight, high fidelity, cardioid condenser microphone, with high quality voice reproduction. The headset is designed for comfort and stability, with a detachable head band, and flexible gooseneck boom for easy microphone placement. The headset mic delivers quality wireless audio to numerous “on the go” applications, making it a great choice for both indoor and outdoor environments.

GT-TS Transmitter can be used as a handheld mic

GT-V Wireless Portable Lavalier Mic

GT-V

- Frequency Response: 20Hz – 20kHz
- Uni-Directional Condenser Cardioid Mic Capsule
- Applications: Classroom, Gym, Track Field, Webcast, Livestream, Social Media, YouTube, Aerobics, Choreography, Tradeshow, Product Demos, and Outdoor Gatherings/Parties

The GT-V portable, wireless lavalier mic is a lightweight, high fidelity, cardioid condenser microphone, with high quality voice reproduction. The lavalier is designed for a more discrete option with a detachable belt clip and element clip for easy placement on clothing. The lavalier mic delivers quality wireless audio to numerous “on the go” applications, making it a great choice for both indoor and outdoor environments.

Galaxy Trek Portable Lightweight Waterproof Headset Microphone

Galaxy Trek Waterproof Headset Mic System

GT-S240WP Lightweight Waterproof Headset Microphone

GT-S240WP

- Waterproof
- Flexible Stainless Steel Gooseneck
- Frequency Range: 20Hz – 20kHz
- Omni-Directional Condenser Microphone
- Applications: Fitness Instructor, Gym Teacher, Aerobics, Yoga, Referee, Dance

The GT-S240WP is a waterproof, lightweight, portable wireless high fidelity headset microphone. The waterproof design makes it an excellent choice for fitness activities such as aerobics, sports activities such as referee, dance and other high-intensity activities. The headset is designed for comfort and stability, with a soft rubber head band and flexible stainless-steel gooseneck boom for easy microphone placement. The mic capsule features a waterproof, dustproof, corrosion resistant shell, making it a great choice for both indoor and outdoor environments.

Excellent For Plugging Into:

Smartphone and Other Smart Devices

Active/Powered Speakers with 1/8" or 1/4" Inputs

Video Recording Cameras with 1/8" or 1/4" Audio Inputs
