Galaxy Audio offers an extensive assortment of affordable, high quality headset microphones. Our latest arrival, the new HSM24 Waterproof Headset Microphone, offers a super lightweight design for a more comfortable fit over extended periods of time, without using excessive pressure to hold the microphone in place. The flexible boom stem makes it easy to position the microphone for clear, articulate sound reproduction.

The HSM24 Waterproof Headset Mic comes with 2 free detachable cables which can be configured to operate with most major wireless brands. Available options are wired to be compatible with transmitters made by Galaxy Audio®, AKG®, Shure®, Audio-Technica®, or Sennheiser®. Galaxy Audio can also custom wire to operate with most brands or models of wireless transmitter and is also compatible with most PC sound cards.

The HSM24 headset mic is the perfect choice for fitness users that may perspire a lot, and for every day users that require a waterproof microphone in wet environments.

Great for applications such as, aerobics, dance, refereeing, on stage, in the classroom, street performing, and more.

Applications

Aerobics, Dance, Referee, On-Stage, Classroom, Street Performing, & More.
