HEADSETS & EARSETS

HSM3 & HSM8 Headsets, ESM3 & ESM8 Earsets

Galaxy Audio offers the best choice for an affordable headset. The super lightweight design makes wearing the microphone more comfortable, even for long periods of time, without using excessive pressure to hold the microphone in place. The soft microphone stem allows for easy adjustment of the microphone's position as you wear the headset. These Headset microphones, work great with many available wireless transmitters. Our Headsets now come with 4 free detachable cables of choice! Available options are wired to work with transmitters made by Galaxy Audio®, AKG®, Shure®, Audio-Technica®, or Sennheiser®. We can also custom wire to work with virtually any brand or model of wireless transmitter. You can also use the microphones with most PC sound cards (JIB/PB adaptor not included). Also, our JIB/PB may be used if a wireless transmitter is not available or needed. The JIB/PB will supply phantom power (if needed) to the headset and adapt the mini connector on the headset to a standard XLR connector so it can be attached to a soundboard.

Headset Microphones

HSM3 *Lightweight Omni Headset Microphone*

HSM3

- Hooks Around Both Ears
- Omni Mic Element
- Flexible for Easy Formation
- 5.5" Adjustable Mic Boom Length
- 5mm Mic Diameter
