Tired of having to stand in one spot to hear your monitor mix? Now you can hear the perfect mix from ANY SPOT!

Galaxy Audio, makers of the original Hot Spot Personal Monitor, has introduced the ANY SPOT (AS-1000). The ANY SPOT is a wireless in ear monitor. Wireless Monitors have become popular over the past few years and now the 'Monitor Guys' are entering into the growing market. "We've introduced an affordable in ear system with great features and quality", says Brock Jabara (Founder/CEO). The ANY SPOT 1000 is a 64 channel true diversity UHF wireless in ear monitor. The ANY SPOT will transmit both mono and stereo signals and features RCA, XLR, and 1/4" inputs. The ANY SPOT allows the user to transmit a CD player, tape player, audio from a computer, iPod, etc and a microphone at once while mixing each signal individually. The receiver is powered from 2 AA batteries and produces a 20mw output. The receiver also features 'Auto-Mute'. Auto-Mute is for those rare times a dropout does occur, the system will mute itself rather than sending static noise into the ears of the user.

ANY SPOT AS1000

MSRP
 AS1000 \$549.99
