The new DSPOT Series offers a full line of Digital Signal Processors. These processors allow the user to manage and clarify the sound produced in their speaker system. Each model can be accessed by the front panel or the convenient, easy to use, included software.

User defined presets provide a useful tool to live sound, where a preset can be used for frequently visited venues or specific performers in a fixed install. Presets can also be saved to internal or removable drives, in addition to the device itself, allowing for a preset to be designed in advance, and then downloaded on site.

The DSPOT software provides many filtering and other detailed settings easily controlled on your PC, to refine your sound. All DSPOTs are perfect for fixed and live applications.

The Galaxy Audio DS-SP24 is a 2 in 4 out Speaker Management System. Each input can be easily assigned to each of the 4 outputs. The system includes Gain, 5 band parametric EQ, and Delay on each of the 2 inputs, as well as, on each of the 4 outputs which also feature high and low pass filters for crossover use, limiters, and polarity reversal. Additionally, each input and output can have your own choice of name assigned to it.

The DS-SP24 gives the user access to a powerful array of Xover, PEQ, Delay, Limiter, Gain, and Polarity controls to help maximize your loudspeaker system. Up to 24 presets can be saved. The DS-SP24 can be configured to have any input go to any out. This provides great versatility, giving many choices such as stereo 2-way, 1x3 with sub, 1x4, etc.

- 2 Input x 4 Output Speaker Processor
- 2 Analog Inputs, Stereo Digital Input, and 4 Analog Outputs
- Each Input has 5 Parametric Bell, or Shelving Filters and each Output has 5 Parametric Bell, or Shelving Filters
- High Pass and a Low Pass Filter up to 24dB/Oct. On each Output
- RMS Limiter each Output
- Input and Output delays up to 850ms, with steps of 1msec and 21usec
- Control via Front Panel or External PC
- External Control via USB as well as RS485
- Balanced XLR Inputs and Outputs
Specifications

Inputs: (2) Bal. Female XLR
Maximum Input Level: +20dBu
Outputs: (4) Bal. Male XLR
Maximum Output Level: +20dBu

Digital Processing (DSP): SAM3716, 24bits (data)
  x 96 bits (coeff.)
A/D Converters: AKM5392, 24bits
D/A Converters: AKM4396, 24bits
Sampling Frequency: 48kHz
S/PDIF Stereo Digital Input: 32kHz, 44.1kHz and
  48kHz Sources Accepted

S/N: 110dBA
THD+N: 0.005%
Frequency Response (Bypass): 20Hz – 20kHz (+- 1 dB)

Power Supply: Switching Power Supply
Remote Control: USB, RS485

Dimensions: 9.25" x 19" x 1.75"
  (234.95 x 482.6 x 44.45 mm)
Weight: 6.3lb (2.86kgs)
