Thank you for your purchase of a Galaxy Audio headset microphone. This Super Lightweight Headset Microphone is highly sensitive, with a wide frequency response for crisp, clear sound. It’s aesthetically pleasing, hands-free design is ideal for vocalists, coaches, teachers or anyone who uses a microphone while speaking or performing.

The microphone works great with many wireless transmitters available. Detachable cables are available to use the ESM8 with transmitters made by Galaxy Audio®, AKG®, Shure®, Audio Technica®, Sennheiser®, etc. When attaching the cable to the headset do not overtighten the threaded connector. You can also use the microphone with most PC sound cards (adaptor not included). Also, our JIB/PB may be used if a wireless transmitter is not available or needed. The JIB/PB will supply bias voltage to the headset and adapt the mini connector on the headset to a standard XLR connector so it can be attached to a soundboard.

The bendable microphone stem allows for easy adjustment of the microphone’s position as you wear the headset.

The super lightweight design makes wearing the microphone more comfortable, even for long periods of time, without using excessive pressure to hold the microphone in place.

**SPECIFICATIONS:**
- **Polar Pattern:** Uni-directional / Omni-directional.
- **Frequency Response:** 50Hz to 16kHz (Uni-directional)
  - 20Hz to 20kHz (Omni-directional)
- **Impedance:** 1kΩ ± 30% (at 1 K Hz) (Uni-directional)
  - 1.8kΩ ± 30% (at 1 K Hz) (Omni-directional)
- **Sensitivity:** 5mV/Pa (Uni-directional)
  - 8mV/Pa (Omni-directional)
- **Max SPL:** 130dB
- **Operating Voltage:** 1.5 - 9Vdc
- **Cable Length:** 4’ (1.22m)
- **Element Diameter:** Omni 3.5mm
  - Uni 7mm

**HOW TO ADJUST FOR THE PROPER ANGLE OF THE MICROPHONE STEM**
Gently bend the boom to the proper position to get the best voice performance.

**WARNING**
The microphone stem could be damaged if it is bent too sharply.
