

# EVO-GTS

Cableless Headset Mic System

# USER'S MANUAL

SUPERIOR SOUND  
FOR YOU

# EVO-GTS Wireless Headset Mic System

## Instructions

1. Put the receiver into the 1/8" (3.5 mm) Mic input of an amplifier, powered speaker, or other audio device or use the included 1/4" (6.5 mm) adapter for 1/4" inputs. For Apple or Android phones, use the included phone adapter cables\*.

3. On the EVO-R Receiver, move the Power switch to On. The Blue LED will begin flashing.

4. On the EVO-GTS Headset Transmitter, move the Power switch to On. The Blue LED will briefly flash until the Transmitter and Receiver automatically pair. The Blue LED will then remain on.

5. Adjust the volume to a suitable level. It is ready for use.

**NOTE:** Factory set to the middle @ Level 5 and each click changes the level +/- 2 dB

## Caution

The LED will turn red when power is low, and will turn off when less than 10%. The LED will also turn red when charging, and the LED will go off when fully charged.

Store in a dry location away from moisture. Avoid excessive heat.

For repair services, please contact Galaxy Audio. Do not attempt open or repair it. Doing so will void warranty.

# EVO-GTS Wireless Headset Mic System

## Specifications

### \*Adapter Cable Notes

**BLACK** Cable – AJH Standard Adaptor Cable  
Used by iPhone & Newer Androids.  
**RED** Cable – OMTP Standard Adaptor Cable  
Used by Older Androids, Nokia devices, laptops, etc.  
**No Adaptor Cable Needed** – Many DSLR Cameras.

You may need to try and test the RED and BLACK cable, or without either cable on your GT-R Receiver to determine which works with your smart device or camera.
