JIB/BT8R

Stereo Bluetooth® Receiver

The JIB/BT8R is a lightweight, compact, portable Bluetooth® receiver that interfaces high quality stereo Bluetooth® audio wirelessly from a smart phone to an active speaker or mixing console. The receiver offers a practical, straightforward audio solution for venues that require a quick wireless set up. Additionally, the receiver offers remote pairing capability by connecting to the included euro-block connector.

The JIB/BT8R features balanced Left/Right XLR and 1/4" line outputs with a volume control. The receiver is powered on 5V DC and comes with a removable 2.4GHz antenna. The receiver can be placed on a flat surface such as a rack shelf or mounted to a mic stand. DJs accepting requested songs that may not have it in their track can allow a user to Bluetooth® a song straight to their mixing console for live DJ mixing. Singers and musicians can stream audio wirelessly to the receiver.

The JIB/BT8R can also be used for a number of other audio streaming applications including dance studios, aerobics, school and gym classes, house of worship, restaurants, nightclubs, event spaces, karaoke, weddings, and many more.
