PHANTOM BODYPACK

Thank you for purchasing the Galaxy Audio JIB/PB Phantom Bodypack. Please visit our website (www.galaxyaudio.com) for the latest updates and FAQ on all of our products and manuals. The JIB/PB Phantom Bodypack is designed to serve as a phantom power adapter for electret microphones that use a mini-XLR (TA3F) connectors. The JIB/PB enables the connection of an electret microphone to an audio system with an XLR microphone connector.

The JIB/PB is primarily used to supply proper power to an electret microphone while running off of phantom power between 9V to 52V. If no phantom power is available, the JIB/PB can still supply power to the microphone by use of a AA battery. When running off of the internal battery, the JIB/PB will supply 1.3V to the microphone.

The JIB/PB also features a belt clip that allows the user to attach the unit to a piece of clothing. The belt clip can also be removed so that the unit can be placed comfortably in a pocket or permanently mounted.

Using the JIB/PB

Connect the microphone to the mini-XLR connector on the JIB/PB. Connect the Male XLR of the JIB/PB to your audio system. If your audio system is supplying phantom power to the JIB/PB, the "off" position and the "flat" position on the switch will both allow audio signal to pass to your audio system. The "Roll-off" position will roll-off frequencies below 185Hz.

If your audio system is not supplying phantom power to the JIB/PB and you are running off of the internal battery, the "off" position will turn the microphone off, the "flat" position will produce an uncolored signal from your microphone, and the "Roll-off" position will roll-off frequencies below 185Hz. When running on batteries, remember to switch the unit off while not in use to avoid draining the battery.

Specifications:

Input: Mini-XLR male (pin 1 ground, pin 2 audio, pin 3 bias)

Output: Balanced male XLR

Power Supplies: 1 – AA battery (1.5V) Phantom power (9-52V)

Switch Positions: Off (battery only), Flat, Low-end Roll-off (185Hz)

Case: Aluminum

Dimensions: 3 X 2.5 X 7/8 Inches (76 X 64 X 22 mm)

Weight: .3lbs (135g)
