

SM-BSSPT Shockmount Base

Version 2

USER GUIDE

The SM-BSSPT ON/OFF button has 3 configurations:

1. Latching On/Off
2. Momentary Push to Talk
3. Momentary Push to Mute

There is a switch on the bottom to select the function.

When in "Push to Talk" the microphone is off unless the button is held.

When in "Push to Mute" the microphone is always live unless the button is held.

When in "On/Off" pressing the button alternates between latching the microphone on and off.

When the blue LED indicator is lit, it means the microphone is live and active.
